Google Chrome is a cross-platform web browser developed by Google. It was first released in 2008 for Microsoft Windows, built with free software components from Apple WebKit and Mozilla Firefox. Versions were later released for Linux, macOS, iOS, and also for Android, where it is the default browser. Wikipedia

**Stable release:** Android - 101.0.4951.61, Linux - 101.0.4951.64, MORE

**Developer:** Google

**Engines:** Blink

**Operating systems:** ChromeOS, Android, Windows

## 2. در قسمت privacy and security روی گزینه Third-party cookies کلیک کرده

The image shows the Chrome Settings page for 'Privacy and security'. The left sidebar contains various settings categories, with 'Privacy and security' highlighted and a red arrow pointing to it. The main content area features a 'Take the Privacy Guide' section with 'Get started' and 'No thanks' buttons. Below this is a 'Safety check' section with a 'Check now' button. The 'Privacy and security' section contains three items: 'Clear browsing data', 'Privacy Guide', and 'Third-party cookies'. A red arrow points to the 'Third-party cookies' item.

### 3. گزینه Allow third-party cookies را فعال کنید.

The image shows the Chrome browser's settings page for cookies. The address bar at the top displays 'Chrome | chrome://settings/cookies'. The left sidebar contains various settings categories, with 'Privacy and security' highlighted. The main content area features a decorative header with colorful shapes and a large cookie icon. Below this, a text block explains that third-party cookies are used for embedding content from other sites. Under the 'Default behavior' section, the text states that sites follow the user's setting. Three radio button options are listed: 'Allow third-party cookies' (which is selected and highlighted with a red arrow), 'Block third-party cookies in Incognito mode', and 'Block third-party cookies'. Each option has a brief description of its function.

- About Chrome

A site you visit can embed content from other sites, for example, images, ads, and text. Cookies set by these other sites are called third-party cookies.

**Default behavior**

Sites automatically follow this setting when you visit them

- Allow third-party cookies**  
Sites can use cookies to improve your browsing experience, for example, to keep you signed in or to remember items in your shopping cart.  
Sites can use cookies to see your browsing activity across different sites, for example, to personalize ads.
- Block third-party cookies in Incognito mode
- Block third-party cookies
